

7. QUICK USER GUIDE

This appliance automatically adjusts the level of the water to the type and quantity of washing. This system gives a reduction in energy consumption and a saving in washing times.

Program selection

- Turn on the appliance and select the required program.
- Adjust the washing settings if necessary and select the required options.

DRYING (WASHER-DRYERS only)
If you would like the drying cycle to begin automatically after washing, select the washing programme required and select the drying cycle. Or you can finish the wash and then select the drying programme.

- Press the programme start button.
- The end of the programme will be indicated by a message on the display (on some models, all the indicator lights on the stage will light up).
- Turn off the appliance.

For any type of wash, see the program table and follow the operating sequence as indicated.

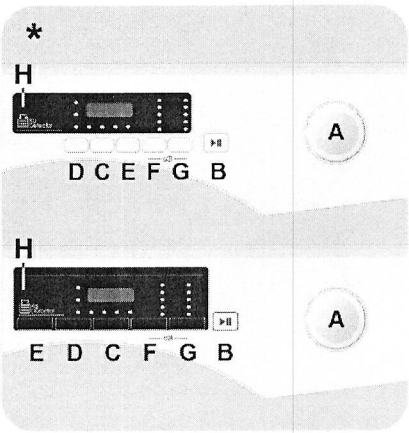

Technical data

Water pressure:
min 0.1 Mpa / max 1 Mpa

Spin r.p.m.: See rating plate.

Power input / Power current fuse amp / Supply voltage: See rating plate.

8. CONTROLS AND PROGRAMS

* Depending on model

- A Programme selector with OFF position
- B START/PAUSE button
- C DELAY START button
- D DRYING SELECTION/EASY IRON button*
- E STAIN LEVEL/RAPID/STEAM LEVEL button**
- F TEMPERATURE SELECTION button
- G SPIN SPEED button
- F+G CHILD LOCK
- H Digital display

* EASY IRON
(only available on certain models)

** STEAM LEVEL
(only available on certain models)

**WARNING:**

don't touch the buttons while inserting the plug because the machines calibrates the systems during the first seconds: touching the buttons, the machine couldn't work properly. In this case, remove the plug and repeat the operation.

EN

PROGRAMME selector with OFF position

- When the programme selector is turned the display lights up to show the settings for the programme selected.
- Switch off the washing machine by turning the selector to **OFF**.

First starting**- Language setting**

- After connecting the machine to the network and turning it on, press the **"TEMPERATURE SELECTION"** or **"SPIN SPEED"** button to display the available languages.
- Select the desired language pressing the **START/PAUSE** button.

- Change the language

- If you want to change the setting language, you will have to press simultaneously **"DRYING SELECTION"** and **"SPIN SPEED"** buttons for about **5 seconds**. **ENGLISH** will appear on the display, and you will be able to choose a new language (by pressing **"TEMPERATURE SELECTION"** or **"SPIN SPEED"** button).
- Press **START/PAUSE** button to confirm your choice.

START/PAUSE button

Close the door **BEFORE** selecting the button **START/PAUSE**.

- To start the selected cycle with the preset parameters, press **START/PAUSE**. When the programme is running, the display will show the time to elapse.

- Moreover, If you want to modify the chosen programme, press the desired options buttons, modify the default parameters and then press **START/PAUSE** button to start the cycle.

Only the options compatible with the set programme can be selected.

- After switching on the appliance, wait a few seconds for the programme to start running.

PROGRAMME DURATION

- When a programme is selected the display automatically shows the cycle duration, which can vary, depending on the options selected.
- Once the programme has started you will be kept informed constantly of the time remaining to the end of the wash.
- The appliance calculates the time to the end of the selected programme based upon a standard loading, during the cycle, the appliance corrects the time to that applicable to the size and composition of the load.

PROGRAMME END

- When the display shows that the programme is finished and the **DOOR LOCKED** indicator light has gone out, the door can be opened.
- At the end of the cycle, switch off the appliance by turning the selector to **OFF**.

The programme selector must be returned to the **OFF** position at the end of each cycle or when starting a subsequent wash cycle prior to the next programme being selected and started.

PAUSING THE MACHINE

- While a cycle is running, the machine can be paused by simply pressing the **START/PAUSE** button.

For safety reasons, in some wash cycle phases, the door can be opened only if the level of the water is below its lower edge and if the temperature is less than 45°C. If these conditions are met, wait for the **DOOR LOCKED** light to switch off before opening the door.

- Press the **START/PAUSE** button again to resume the programme from the cycle phase where it left off.

CANCELLING THE SET PROGRAMME

- To cancel the programme, set the selector to the **OFF** position.
- Wait until the **DOOR LOCKED** light has gone out before opening the door.

DELAY START button

- This button allows you to pre-programme the wash cycle to delay the start of the cycle for up to **24 hours**.
- To delay the start use the following procedure:
 - Select the required programme.
 - Press the button once to activate the delay start and then press it again (or hold it) to set the desired delay. The delay increases each time the button is pressed up to **24 hours**, at which point pressing the button again will reset the delay start to zero.
 - Confirm by pressing the **PLAY/PAUSE** button. The delay countdown will begin and when it has finished the programme will start automatically.
- It is possible to cancel the delay start by turning the programme selector to **OFF**.

If there is a break in the power supply whilst the machine is operating, when the power is restored, the machine will restart from the beginning of the phase it was in when the power was lost.

DRYING SELECTION / EASY IRON button*

This button allows you to choose between two different functions:

- DRYING SELECTION

- **Automatic washing/drying cycle:** after the selection of washing programme according to laundry type, select a degree of dryness by pressing this button. At the end of the washing programme, the selected drying cycle will start automatically.

If a washing programme is not compatible with automatic drying is selected, this function will not be activated.

If you exceed the maximum dryable load of laundry indicated in the programme table, the laundry may not be dried satisfactory.

- **To only perform a drying cycle:** select the desired drying programme in conjunction with your fabrics, by pressing this button it is possible to select a degree of dryness that is different to the default one (except for the wool drying programme).
- To cancel the cycle **during the drying phase**, press the button for about **3 seconds**.
- When the display shows that the programme is finished and the **DOOR LOCKED** indicator light has gone out, the door can be opened.

- EASY IRON*

This function allows you to minimize creases as much as possible, eliminating the intermediate spins or reducing the intensity of the last one (available on some programmes only).

To select this option, press repeatedly the button (or keep it pressed) until the relevant indicator lights up ().

*** EASY IRON**
(only available on certain models)

STAIN LEVEL / RAPID / STEAM LEVEL button*

This button allows you to choose between three different options, depending on the selected programme:

- STAIN LEVEL

- Once the programme has been selected the wash time set for that programme will be automatically shown.
- This option allows you to choose between 3 levels of wash intensity modifying the length of the programme, depending on how much the fabrics are soiled (**can only be used on some programmes as shown in the table of programmes**).

- RAPID

The button becomes active when you select the **RAPID (14'/30'/44')** programme on the knob and allows you to select one of three durations indicated.

- STEAM LEVEL*

After selecting the **EASY IRON** programme, you can use this button to choose between three steam treatments of different intensities, designed for dry or wet garments and depending on the type of fabric:

- COTTON (default selection)

This programme is used for cotton garments. On wet fabrics (e.g., after washing), it is suitable for relaxing creases after spinning; on dry fabrics it is instead designed to achieve the ideal humidity level for easier ironing.

- SYNTHETIC (press button once)

This programme is used for synthetic garments. On wet fabrics (e.g., after washing), it is suitable for relaxing creases after spinning; on dry fabrics it is instead designed to achieve the ideal humidity level for easier ironing.

- DELICATES (press button twice)

With the help of steam, the cycle refreshes and relaxes creases in garments after use. The programme consists of an initial phase in which the steam acts and a final phase in which the excess humidity is removed for immediate use. The cycle is suitable for dry fabrics.

These options must be selected before pressing the START/PAUSE button.

***STEAM LEVEL**
(only available on certain models)

TEMPERATURE SELECTION button

- This button allows you to change the temperature of the wash cycles.
- It is not possible to raise the temperature over the maximum allowed for the programme, in order to protect the fabrics.
- If you want carry out a cold wash all the indicators must be off.

SPIN SPEED button

- By pressing this button, it is possible to reduce the maximum speed, and if you wish, the spin cycle can be cancelled.
- If the label does not indicate specific information, it is possible to use the maximum spin expected in the program.

To prevent damage to the fabrics, it is not possible to increase the speed over the maximum allowed for the programme.

- To reactivate the spin cycle press the button until you reach the spin speed you would like to set.

- It is possible to modify the spin speed without pausing the machine.

An over dosing of detergent can cause excessive foaming. If the appliance detects the presence of excessive foam, it may exclude the spinning phase or extend the duration of the program and increase water consumption.

The machine is fitted with a special electronic device, which prevents the spin cycle should the load be unbalanced. This reduces the noise and vibration in the machine and so prolongs the life of your machine.

CHILD LOCK

- Pressing simultaneously the buttons "TEMPERATURE SELECTION" and "SPIN SPEED" for about 3 seconds, the machine allows you to lock the keys. In this way, you can avoid making accidental or unwanted changes if a button on the display is pressed accidentally during a cycle.
- The key lock can be simply cancelled by pressing the two buttons simultaneously again or turning off the appliance.

Kg Detector system (only active in some programmes)

Through every wash phase "Kg Detector" allows to monitor information on the wash load in the drum and in the first minutes of the wash it:

- adjusts the amount of water required;
- determines the length of the wash cycle;
- controls rinsing according to the type of fabric selected to be washed it;
- adjusts the rhythm of drum rotation for the type of fabric being washed;

- recognizes the presence of lather, increasing, if necessary, the amount of water during rinsing;
- adjusts the spin speed according to the load, thus avoiding any imbalance.

Digital Display

The display's indicator system allows you to be constantly informed about the status of the machine.

* Depending on model

1) CYCLE DURATION

- When a programme is selected the display automatically shows the cycle duration, which can vary, depending on the options selected.
- During the initial filling phase of the cycle the machine calculates the actual cycle time needed based on the load size, content and options selected. The real time of the wash will then be displayed. This time can recalculate during the wash depending on detergent levels and load balancing.

2) DRYING SELECTION INDICATOR LIGHTS

The indicators display the degrees of dryness that can be selected by the relevant button:

Automatic drying programmes

EXTRA DRY

(suitable for towels, bathrobes and bulky loads).

**IRON DRY**

(that leaves the laundry ready for ironing).

**CUPBOARD DRY**

(for items that will be put away without ironing).

3) Kg Detector INDICATOR LIGHT

(only included in some models)

During the first minutes of the cycle, the "Kg Detector" indicator will remain on while the intelligent sensor will weigh the laundry and adjust the cycle time, water and electricity consumption accordingly *(only active in some programmes)*.

3) EASY IRON INDICATOR LIGHT

(only included in some models)

The indicator light shows the selection of the relevant option.

4) DOOR LOCKED INDICATOR LIGHT

- The indicator light is illuminated when the door is fully closed.

Close the door BEFORE selecting the START/PAUSE button.

- When **START/PAUSE** is pressed on the machine with the door closed, the indicator will flash momentarily and then illuminate.

If the door is not properly closed, the light will continue to flash for about 7 seconds, after which the start command will be automatically cancelled. In this case, close the door in the proper way and press the START/PAUSE button.

- Wait until the **DOOR LOCKED** light has gone out before opening the door.

5) KEY LOCK INDICATOR LIGHT

The indicator light show that the keys are locked.

6) Wi-Fi INDICATOR LIGHT

- On models equipped with Wi-Fi, it indicates the status of the connection. It could be:

- **FIXED ON:** remote control enabled.
- **SLOW FLASHING:** remote control disabled.
- **QUICK FLASHING FOR 3 SECONDS, THEN OFF:** the machine cannot connect to the home Wi-Fi network or has not yet been associated with the App.
- **SLOW BLINKING FOR 3 TIMES, THEN OFF FOR 2 SECONDS:** reset of the Wi-Fi network (during the association with the App).
- **ON FOR 1 SECOND, THEN OFF FOR 3 SECONDS:** the door is open. Remote control cannot be activated.

7) WASH TEMPERATURE INDICATOR LIGHTS

This show the washing temperature of the selected programme that can be changed (where allowed) by the relevant button. If you want carry out a cold wash all the indicators must be off.

8) SPIN SPEED INDICATOR LIGHTS

This show the spin speed of the selected programme, you can reduce or omit by the relevant button.

	REMOTE CONTROL (Wi-Fi) Position that you have to select when you want to enable remote control through the App (via Wi-Fi).															

Description of programmes

To clean different types of fabrics and various levels of dirt, the washing machine has specific programs to meet every need of washing (see table of programmes).

Choose programme in accordance with the laundry instructions appearing on labels, especially the maximum recommended temperature.

WASHING

WARNING: IMPORTANT WASH PERFORMANCE ADVICE.

- New, coloured garments should be washed separately for at least 5 or 6 washes.
- Certain large dark items such as jeans and towels should always be washed separately.
- Never mix NON COLOURFAST fabrics.

REMOTE CONTROL (Wi-Fi)

Position that you have to select when you want to enable / disable remote control through the App, via Wi-Fi. In this case, the start of cycle will take place through the App commands. More details in the **REMOTE CONTROL (Wi-Fi)** section.

COTTONS

This programme is suitable for washing coloured cotton garments at 40°C or for ensuring the highest degree of cleanliness for cotton resistant laundry washing at 60°C or 90°C. The final spin is at maximum speed that ensures excellent water removal.

ECO 40-60

The **ECO 40-60** programme is able to clean normally soiled cotton laundry declared to be washable at 40°C or 60°C, together in the same cycle. This programme is used

to assess the compliance with the EU Ecodesign legislation (environmentally friendly products design).

WASH AND DRY (ECO 40-60 +)

The **WASH AND DRY** cycle is able to clean normally soiled cotton laundry declared to be washable at 40°C or 60°C, together in the same cycle, and to dry it in such a way that it can be immediately stored in a cupboard. This programme is used to assess the compliance with the EU Ecodesign legislation (environmentally friendly products design).

COTTON + PREWASH

This programme has been designed to remove the stronger stains from cotton white clothes. The prewash guarantees the tough dirt removal. Add into compartment "1" a quantity of detergent equal to 20% of that used for main wash.

SYNTHETIC AND COLOURED

This programme allows you to wash different type's fabrics and different colours all together. The rotation movement of the drum and the water levels are optimized, both during the washing the rinsing phase. The accurate spin action, ensures a reduced formation of creases in the fabrics.

RINSE

This program performs 3 rinses with an intermediate spin (which can be reduced or excluded by using the appropriate button). It is used for rinsing any type of fabric, for example after a wash carried out by hand.

DRAIN & SPIN

The program completes the drain and a maximum spin. It is possible to delete or reduce the spin through the **SPIN SELECTION** button.

WOOL/DELICATES 49'

This programme performs a wash cycle dedicated to the "Machine Washable" Wool fabrics, to the articles to be washed by hand and to treat delicate garments and precious fabrics. This programme washes at a low temperature for 49 minutes. Recommended for small loads.

RAPID (14'/30'/44')

Saving without compromising! This new programme may be used to obtain excellent results while saving water, energy, detergent and time. This option washes at a medium temperature suitable for any kind of fabric. Recommended for small loads and lightly soiled items.

MIXED & COLOURED 59' *

This programme offers you the freedom to wash all kinds of fabrics and non-fading colours together, with a full load, obtaining excellent results in only 59 minutes. With washing at medium temperature, this programme is recommended for laundry that is not particularly dirty.

** Preset temperature of 20°C (modifiable by the relevant button). The washing cycles are also suitable for washing cotton fabrics.*

EASY IRON

This programme uses a steam treatment to relax creases and achieve the ideal degree of humidity for easier ironing. Three different intensity levels can be selected via the STEAM LEVEL button, designed for dry or wet garments and depending on the type of fabric.

SPECIAL 49'

This programme's innovative technology cuts the amount of time we spend doing laundry ensuring anyway high washing performance at medium temperatures in only 49 minutes.

DRYING**WARNING:**

Dispensers used for concentrated powders and liquid detergents must be removed from the drum before commencing the tumble drying programmes.

The drum changes direction during the drying cycle to prevent the laundry from tangling and producing even more drying.

Cool air is used during the last 10/20 minutes of the drying cycle to minimize creasing.

DRY WOOL

Low temperature drying programme, ideal to dry woollen clothes with maximum care and softness, reducing rubbing of fabrics and avoid possible felting. It's suggested to reverse clothing before drying. Timing is related to the amount of the washing and the spin speed selected for the wash. The cycle is suitable for small loads up to 1 kg (3 sweaters).

APPAREL CARE

The wool drying cycle of this machine has been approved by "The Woolmark Company" for the drying of machine washable wool products provided that the products are washed and dried according to the instructions on the garment label and those issues by the manufacturer of this machine.

The Woolmark symbol is a Certification mark in many countries.
M1715

LOW HEAT

Low temperature drying programme recommended for synthetics and mixed fibres (always refer to the laundry care label).

HIGH HEAT

High temperature drying programme recommended for cottons and linen items (always refer to the laundry care label).

9. DRYING CYCLE

- Drying guidance advice is general, but practical experience of using the product will help you to achieve the best drying results.
- We recommend setting a lower drying time than indicated, when first using the appliance in order to establish the degree of dryness required.

- We recommend not drying fabrics that fray easily, such as rugs or garments with a deep pile, in order to avoid air duct clogging.

- We recommend that you sort the laundry by the following methods:

- **By drying care symbols, which are displayed on the clothing labels**

- ☐ Suitable for tumble drying.
- ☐ Tumble dry at high temperature.
- ☐ Tumble dry at low temperature only.
- ☒ **DO NOT** tumble dry.

If the fabric does not have a care label, you should assume that it is not suitable for drying.

- **By size and thickness**

Whenever the wash load is bigger than the drying capacity, separate the clothes according to thickness (e.g. towels from thin underwear).

- **By fabric type**

Cottons/linen: towels, cotton jersey, bed and table linen.

Synthetics: blouses, shirts, overalls, etc. made of polyester or polyamide, as well as for cotton/synthetic mixes.

- Only dry pre-spun laundry.

The correct way to dry

- Open the door.
- Fill with the laundry, not exceeding the maximum drying load indicated in the programme table. For large items (e.g. sheets) or very absorbent items (e.g. towels or jeans), it is a good idea to reduce the load.
- Close the door.
- Select the more suitable drying program for your laundry (**HIGH HEAT, LOW HEAT, DRY WOOL**).
- Select the degree of dryness that you require:

EXTRA DRY

(suitable for towels, bathrobes and bulky loads).

IRON DRY

(that leaves the laundry ready for ironing).

CUPBOARD DRY

(for items that will be put away without ironing).

TIMED DRYING PROGRAMS

- 120 MINUTES
- 90 MINUTES
- 60 MINUTES
- 30 MINUTES

By selecting the wool drying programme, it's not possible to select a degree of dryness different from the default one.

- The washer dryer will calculate the time needed for drying and the level of moisture remaining in the laundry, according to the load and drying type selected.

- Check that the tap is turned on and that the discharge hose is positioned correctly.

During the drying phase the drum will accelerate to a higher speed to distribute the load and to optimize the drying performance.

NE

WARNING:

Do not dry articles with special padding (e.g. quilts, quilted anoraks, etc.) and very delicate fabrics. If garments are drip/dry, load less items to prevent creasing.

In order to ensure the correct operation of the appliance, it is advisable not to interrupt the drying phase unless it is absolutely necessary.

AUTOMATIC WASHING/DRYING CYCLE

- Press the **START/PAUSE** button (the display will show the drying time remaining).

You cannot exceed the maximum dryable load of laundry indicated in the programme table, otherwise the laundry will not be dried satisfactory.

The appliance calculates the time to the end of the selected programme based upon a standard loading. During the cycle, the appliance corrects the time according to the size and composition of the load.

If you want a drying cycle to start automatically after washing, simply select the desired washing cycle, set the desired degree of drying through the **DRYING SELECTION** button and start the cycle. At the end of the washing programme, the set drying cycle will automatically start (see section "**DRYING SELECTION**").
